Sarawak Diving Holidays

Largely unknown to the diving world, Sarawak has dive sites that have been compared favourably with Sipadan and Australia's Great Barrier Reef. The best sites are found on a live-aboard trip that allows you to explore the Luconia Shoals, first explored in the 1980s by divers from Brunei Shell Petroleum. The visibility is astounding, as is the variety of marine and coral life. You can dive among World War wrecks and share them with giant manta rays.

For those with less time the Tukai and Siwa Shoals are just a 40 minute boat ride from Miri while the Batu Mat Reef is 1 hour and 45 minutes away. While the water at the western end of the State near Kuching is not as clear, there are interesting dives to offshore islands where turtles breed. At the extreme western end of the State, Tanjung Datu National Park has crystal clear waters and coral formations close to shore. It is still waiting to be explored as a diving area.

FUN DAY DIVES Ex Miri 5 hours

Clients are picked up from their hotel and taken out to dive sites selected by the divemaster according to sea and weather conditions. Dive sites available and subject to the divemasters discretion are as follows:

Sri Gadong Wreck A small 30m cargo ship carrying sawn timber is sitting on 18m of sandy bottom. The whole wreck is teeming with fish life. Jacks, yellow grunts, batfish and barracudas are circling around the wreck while the giant groupers swim in and out of the cargo holds.

Grouper Patch Giant groupers inhabit this reef of 15-18m. Spiny lobsters are also another inhabitant together with yellow tails and other schooling fish.

Tukai Drop-Off An exciting reef that drops from 20-40m. At the vertical wall schooling jacks, barracudas, Napoleon Wrasses, yellow tail fusiliers and large groupers are always around to greet you. Occasionally sharks and trumpet fish can be seen.

Eve's Garden This shallow reef of just 7-12m is carpeted with soft corals such as leather corals, elephants ear and dead man's fingers. Giant anemones and clown fish are all over the reef. This reef is also characterised by the schooling yellow tail fusiliers and angelfish.

Anemone Garden One of the most interesting reefs with a depth range of 10 to 16 meters. Both hard and soft corals thrive here. You wouldn't miss the anemones and their symbiotic clown fish. You will also find bubble corals, anchor corals and the colourful dendronephthya soft corals. Others like feather stars, giant clams, Nudibranchs and schooling yellow tails are plentiful.

Departure: 9.00am daily (Feb - Sep only)

Adult: \$154pp **Child:** N/A

Tour Includes: Return hotel transfers, packed lunch, 2 dives accompanied by the divemaster, tanks, weights and weight belt. A liability release waiver must be signed prior to the trip.
